Engineering Excellence for the Automotive world

Engineering Excellence
for the Automotive world

DOMAINS

Every idea, every conception, every mental image, every vague notion has the same eventual destiny. Reality. The bridge between these entities and their eventual form could be something as unpretentious as a drawing board. This bridge, its efficiency, and capability are what ultimately define the proximity to perfection that the end product achieves. In our case, the Automobile.

The perfect outsourcing solutions partner is an entity that addresses your technology and cycle time requirements and budget constraints, while ensuring the required quality, efficiency, reliability, & last but certainly not the least, data confidentiality - exactly what Satven can be counted on to achieve on a consistent basis for you.

OUR VALUE PROPOSITIONS INCLUDE:

- Capabilities to deliver multiple competencies across practically all automotive domains
- The ability to deploy teams with the right skills to suit your budget and time constraints
- Quality processes that conform to ISO 9001:2008 (Quality Management) and ISO 27001:2013 (Information Security Management)
- Usage of Six Sigma concepts for continual improvement
- Value engineering across the product life cycle
- Competitive cost structures that ensure consistent savings
- Innovative engagement models for your discerning needs

Manufacturing Engineering

VAVE
Tool Design/Fixture Design
Digital Manufacturing
Supplier Quality Engineering

Solutions

Product Design & Engineering
Reverse Engineering
Knowledge Based Engineering
Product Teardown
Competitive Benchmarking
Vendor Development
Systems Engineering
Homologation Support

Service Offerings Design

CAD Modeling & Detailing
Engineering Change Management
Dimensional Management with
Tolerance Stack Analysis

Simulation

Crashworthiness
Occupant safety & pedestrian protection
NVH
Durability, Fatigue evaluations
Computational Fluid Dynamics
Multi-Body Dynamics
